1. Background

With most of the population of Meghalaya living in rural areas, agriculture remains the main source of income and livelihood. Consequently, the importance of strengthening the agricultural sector is high. Thus, various mission-mode projects have been initiated by the government to undertake end-to-end and focused crop-wise interventions, to bring in transformational changes in their value chains. The various missions of the State include Lakadong Mission, Ginger Mission, and Mushroom Mission among others.

MBMA wants to set up community-based primary and secondary processing units for ginger and other spices across the state. Owing to the remoteness of many of the villages, challenging terrain and unreliable power source, the processing units will be powered by Solar energy solutions. Thus, MBMA is looking for empanelment of agencies for installation, commissioning & comprehensive maintenance of Solar tunnel dryers.
